Workshop 1: Energy policy

1.1 Description

Energy management is becoming more and more an important issue in the world. Because of:

- Energy resources
- Climate changes
- Closing nuclear energy power plant
- Last item war between Ukraine and Russia

During this workshop you will compare how energy management is in Belgium and in Slovakia. Use information you can find on the internet.

1.2 Questions

Make a study about the European green deal and climate change.

What will Europe do about the increasing energy prices and where will we still get our energy from if we want to disconnect from on Russian energy sources? (look for this item to whole Europe)

Compare Slovakian with Belgium:

- Which power plants do you have in your country and what is the share of each
- What are the costs of your energy at home?
- Do you have solar panels, windmill, sun boiler, heat pump….. at your home?
- How do you try to reduce energy consumption at your home?
- …
